## **MEMORANDUM**

**To:** W. David Wimberly  
**From:** Paul W. Bixby  
**Subject:** Status Report

### **Business and Administrative Strategic Information System II**

Refer to BASIS II Status memo to the BASIS Steering Committee, dated June 1, 1992.

From the main office in Peoria, Illinois....the top ten reasons to be on the BASIS II team:

- Number 10 - You get to go to a bunch of meetings and meet new and interesting people.
- Number 9 - You might get to go to New Orleans. NOT!
- Number 8 - You can take lots of notes and still not have anything that makes any sense.
- Number 7 - You can generate two questions for each "answer" you get from the user.
- Number 6 - You get doughnuts at the meetings.
- Number 5 - How about that state salary?
- Number 4 - You get to forget everything you knew about database structure and start over with Adabas
- Number 3 - You see executive decision-making in a dog-eat-dog atmosphere up close and personal.
- Number 2 - You're asked to draw pretty pictures.

And the number one reason for being on the BASIS II team:

The margaritas.

Any Questions?
