I appreciate receiving information on the progress of the BASIS and TARGET projects. I believe the information presented to the VC's and Chancellor was very good. In reading the latest status report (for the month of May, and dated June 1), it occurred to me that we should start getting information out in the bulletin and other communications. We might wish to target the September issues of the bulletin, the student newspaper, and other publications to get information about this project around the campus. The list of program walk-throughs to date is, in my opinion, very impressive. I believe the current design phase can be described in a very positive manner, and would make an excellent story.

Thanks

Gerry Bomotti
